Detailed Action

1. Claims 1-12 and 15-26 are presented for examination.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The pending claims are allowable for the reasons set forth in applicants arguments filed 2/18/05 on page 11 to page 13. The Beardsley et al. appears to probe the other devices and stores that information (see Col 8 Lines 37-45) to determine information on the topology for creating the logical paths. As argued by Applicant, there "is no description or suggestion that dynamic switch 305 or 315 provides information identifying ports of the other data storage systems connected to the switch, as claimed." (see P 12 Lines 23-25) In the present invention the switch fabric provides the information about the other devices, the system is capable of "determining from a switch fabric ... information identifying ports of the switch fabric" and then "using the configuration topology information and the information obtained from the switch fabric to establish a logical link between a port on the storage system and a port on a second storage system".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
